hear from the state archeologist who has the maps and hopefully can tell you of any affected state property, but no leadership thinks anyone's been approached regarding the pipeline and DNCR property. It appears to run east of Medoc, west of Bentonville, and stop before it hits Lumber River

Ok. Excellent intel. Thank you.

State archeologist reports that zero permits have been requested from pipeline for any crossing of state property, and parks confirmed no one has approached them

Ok thanks
